Range of Provision and inclusion information:	
<p>How we identify special educational learning needs as a school and how we seek the views, opinions and voice of pupils and their parents in planning to meet them.</p>	<ul style="list-style-type: none"> • When pupils have identified SEND before they join us, we work with the people who already know them and use the information they already have available to identify what their SEN will be in our school setting • If you tell us you think your child has SEN, we will discuss this with you to investigate it further. We will share with you what we find out and agree next steps with you as to how we can all help your child. • If your child does not appear to be making the same level of progress as other children of their age, we will undertake assessment in school and by using other professionals to identify possible barriers to their learning. Parents and carers will be involved at all stages. • We are child and family centred so you will be involved in all decision making about your child's support. • When we assess SEN we discuss whether understanding and behaviour are the same at school and at home; we take this into account and work with you so that we are all helping your child in the same way. • We will write Support plans for pupils and share them with parents/carers. • We use homework to repeat and practise activities that are new and present an achievable challenge.
<p>What extra support we bring in to help us meet SEND: specialist services, external expertise and how we work together. For example health, social care, local authority support services and voluntary sector organisations.</p>	<ul style="list-style-type: none"> • We have support from specialist teachers and support staff for accessing the curriculum and additional input for specific needs e.g. speech, language and communication, visual and hearing impairment, behaviour related difficulties, autistic spectrum conditions, moderate / severe learning difficulties. • We receive support from local authority services. • We receive support from occupational therapy and physiotherapy for pupils who require this input and specific resources. • We receive support from specialist and professional agencies to train our staff; advise on strategies and programmes and we will make referrals for assessment if we believe your child requires a period of therapy. • We will hold multi-professional meetings with parents and the pupil, where necessary, to review the child's progress. At these meetings the following types of discussions will take place; what will be put into place in school to make teaching and learning more effective, agree targets for pupils achievement, agree how we will work together and what actions we each will take, agree a review date to explore how well the pupil is doing and whether we are making a difference, and what we will do next. This information is recorded to ensure accountability. • Our staff have a lot of experience with a variety of SEN • All classes two members of staff, a teacher and a TA. • TAs will deliver well planned interventions matching the children's needs every afternoon. The Boxall profile will be used as a tool to assess and support with implementing strategies for children with social, emotional and behavioural difficulties. <p>Contact details of regularly used external agencies: Chatterbug – 01928 511075 Woodview – 0151 495 5400</p>

ANNUAL REVIEW 2019-2020	
Completed by: C Percival Date: September 2019	

SEND Broad Areas of Need**Communication and Interaction**

6.28	Children and young people with speech, language and communication needs (SLCN) have difficulty in communicating with others. This may be because they have difficulty saying what they want to, understanding what is being said to them or they do not understand or use social rules of communication. The profile for every child with SLCN is different and their needs may change over time. They may have difficulty with one, some or all of the different aspects of speech, language or social communication at different times of their lives.
6.29	Children and young people with ASD, including Asperger's Syndrome and Autism, are likely to have particular difficulties with social interaction. They may also experience difficulties with language, communication and imagination, which can impact on how they relate to others.

Cognition and Learning

6.30	Support for learning difficulties may be required when children and young people learn at a slower pace than their peers, even with appropriate differentiation. Learning difficulties cover a wide range of needs, including moderate learning difficulties (MLD), severe learning difficulties (SLD), where children are likely to need support in all areas of the curriculum and associated difficulties with mobility and communication, through to profound and multiple learning difficulties (PMLD), where children are likely to have severe and complex learning difficulties as well as a physical disability or sensory impairment.
6.31	Specific learning difficulties (SpLD), affect one or more specific aspects of learning. This encompasses a range of conditions such as dyslexia, dyscalculia and dyspraxia.

Social, Emotional and Mental Health difficulties

6.32	Children and young people may experience a wide range of social and emotional difficulties which manifest themselves in many ways. These may include becoming withdrawn or isolated, as well as displaying challenging, disruptive or disturbing behaviour. These behaviours may reflect underlying mental health difficulties such as anxiety or depression, self-harming, substance misuse, eating disorders or physical symptoms that are medically unexplained. Other children and young people may have disorders such as attention deficit disorder, attention deficit hyperactive disorder or attachment disorder.
-------------	---

Sensory and/or Physical Needs

6.34	Some children and young people require special educational provision because they have a disability which prevents or hinders them from making use of the educational facilities generally provided. These difficulties can be age related and may fluctuate over time. Many children and young people with vision impairment (VI), hearing impairment (HI) or a multi-sensory impairment (MSI) will require specialist support and/or equipment to access their learning, or habilitation support. Children and young people with an MSI have a combination of vision and hearing difficulties. Information on how to provide services for deafblind children and young people is available through the Social Care for Deafblind Children and Adults guidance published by the Department of Health (see the References section under Chapter 6 for a link).
6.35	Some children and young people with a physical disability (PD) require additional ongoing support and equipment to access all the opportunities available to their peers.
