

This Week at Skills Up !!!

Lots going on at Skills Up this week! The week started with us working on our t-shirt designs, linked to our budget and shopping task. Clients created a range of designs and then personalised them with their own text. They practised lots of ICT skills in doing this. Super designing!

Our 'Lovely Lunch' tasks allow clients to practise a range of

cooking skills to help them in independent living. We have been really impressed with how clients have taken on board skills and knowledge in prior sessions and are demonstrating it in new tasks. This week, we made a delicious tuna pasta.

All of our activities work on communication. Each week, we share news and ask each other questions on it. We have seen a lot of progress in clients' confidence, questioning and listening skills. Well done!

Last week was Enterprise Week. Our enterprise challenge was to design, make and sell a new milkshake. Clients had some great ideas and created some tasty drinks - naming them, then role-playing selling them.
