AET ANXIETY MODULE- UNDERSTANDING ANXIETY IN AUTISTIC PUPILS

DfE Recognised CPD Accredited

OVERVIEW

A practical guide to supporting pupils in primary and secondary schools with autism and anxiety

WHO IS IT FOR?

- Teachers
- Teaching Assistants
- SENCO in Primary/ Secondary schools

WHAT YOU WILL LEARN

This module on autism and anxiety in schools will provide delegates with an understanding of what we mean by anxiety, how it appears in autistic children and young people (CYP), what the key triggers are, and what teaching staff can do to support autistic pupils.

There are resources, a reading list, and academic papers that you can refer to. These are all free to access and can be downloaded. There is also a document on suggested reasonable adjustments to reduce anxiety. These training materials will be linked in the training materials section of this delegate pack or shared directly with you by the trainer.

PREVIOUS DELEGATE COMMENTS

"Very good all round session and my knowledge of autism and anxiety has drastically improved"

"Brilliant learned so much from course"
