Range of Provision and inclusion information:	
How we identify special educational learning needs as a school and how we seek the views, opinions and voice of pupils and their parents in planning to meet them.	<p>The Special Educational Needs and Disability Code of Practice: 0 to 25 years (Statutory guidance for organisations who work with and support children and young people with special educational needs and disabilities), effective September 2014, details four broad areas of need as follows:</p> <ul style="list-style-type: none"> Communication and interaction Cognition and learning

Range of Provision and inclusion information:

Social, emotional and mental health difficulties

Sensory and/or physical needs.

Provision is made for these four areas of need by:

- When pupils have an identified SEND before admission, we work with the staff from the pupils' current school, parents/carers and outside agencies, who already know them, and use the information they already have available to identify what their SEND will be in our school setting.
- If you tell us you think your child has SEND we shall discuss this with you and investigate. We shall share with you what we find out and agree next steps with you as to how we can all support your child.
- If your child does not appear to be making the same rate of progress as other children of their age we shall undertake assessment in school and identify possible barriers to their learning. On occasions we engage other professionals too. Parents/carers are involved at all stages.
- We are child and family centred so you will be involved in all decision making about your child's support.
- When we assess SEND we discuss if understanding and behaviour are the same in school and at home; we take this into account and work with you so that we are all helping your child in the same way - the Pastoral Lead can make home visits to support you in getting your child into school, if this is a barrier.
- WellComm assessments are used to identify communication barriers.
- We write Individual Inclusion Plans (IIPs) and/ or Wellbeing Support Plans (WSPs) with pupils and parents/carers, when pupils are receiving an intervention or adaptation that is 'additional to and different from' that which the rest of their peers receives in school.
- We use homework to consolidate and practise learning that is new and present an achievable challenge.

Range of Provision and inclusion information:	
	<ul style="list-style-type: none"> The Reading Diary is used for recording daily reading, Homework and can be used for two-way communication between school and parents/ carers. <p>Parents/ Carers meetings keep you informed of your child's progress during the year and give you opportunity to make comments and/ or suggestions to support your child's learning.</p>
<p>What extra support we bring in to help us meet SEND: specialist services, external expertise and how we work together. For example: health, social care, local authority support services and voluntary sector organisations.</p>	<ul style="list-style-type: none"> We have support from specialist teachers and support staff for accessing the curriculum and additional input for specific needs e.g., speech, language and communication, visual and hearing impairment, occupational therapy, behaviour related difficulties, autism spectrum conditions, moderate / severe learning difficulties, downs syndrome, cerebral palsy, attachment difficulties. SENDCO attends Educational Psychology Service consultations. Local Authority services and local special schools provide outreach. We access support from occupational therapy and physiotherapy for pupils who require this input and specific resources. We procure support from specialist and professional agencies to train our staff; advise on strategies and programmes and we will make referrals for assessment if we believe a period of therapy is required. For those children with an EHCP, we hold termly meetings including multi-professional review meetings annually with parents/carers and the pupil, where necessary, to review the child's progress. At these meetings the following types of discussions take place: what will be put into place in school to make teaching and learning more effective, targets for the pupil's achievement are agreed. We confirm how we will work together and what we each will do. We decide on a review date to explore how well the pupil is progressing, whether we are making a difference and the next steps that are required. This information is recorded in an Individual
